

## The Day After Heritage Protection Initiative Site Monitors Project

### Site Monitor Report Citadel at Ma'arra Al-Nu'man

August 2015.

The following observations were recorded:

- 1- Neglect over the last five years is one of the biggest factors contributing to the severe damage inflicted upon the citadel .
- 2- Most of the damage is due to weathering.
- 3- Damage was also sustained from housing and grazing sheep on the site.

The site needs urgent repairs especially in the areas circled in red:

Locations that need urgent repairs to fortify calcareous layer beneath the citadel

Reported by:

Eng. Abdul Rahman Alyehia (Syrian Heritage Centre)

**Site Monitors Project Coordinator**

**Dr. Amr Al-Azm**
